Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the shaft rotatably supported by bearings in a motor yoke or impeller must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. **Claims 1-4** are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The feature of the shaft rotatably supported by bearings in a motor yoke or impeller is not supported by drawings or the specification.

Art Unit: 2834

5. **Claims 1-4** are also rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. For the reasons indicated above one skilled in the art would not be able to make and/or use the invention.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

7. **Claim 1** is rejected under 35 U.S.C. 102(b) as being anticipated by **Harmsen et al.** (US 4,992,029).

Harmsen et al. disclose in Figure 6 invention as claimed: a motor comprising a shaft 12 supported by bearings, a motor yoke 22 having a cylindrical portion fitting within a cylindrical portion 19a of an impeller 2, wherein the motor yoke is fixedly attached by hooking members 72 integrally molded with the impeller of elastic resin.

8. **Claims 1, 3 and 4** are rejected under 35 U.S.C. 102(b) as being anticipated by **Baker** (US 5,574,321).

Baker discloses in Figures 3, 5 and 10 invention as claimed: a motor comprising a shaft 24 supported by bearings, a motor yoke 20 having a cylindrical portion fitting within a cylindrical portion 30 of an impeller 3, wherein the motor yoke is fixedly attached by hooking members or flanges 38 integrally molded with the impeller of elastic resin engaging the opening edge of the yoke.

9. **Claims 1 and 2** are also rejected under 35 U.S.C. 102(b) as being anticipated by **Kershaw et al. (US 5,944,497)**.

Kershaw et al. disclose in Figures 1-3 invention as claimed: a motor comprising a shaft supported by bearings, a motor yoke 18 having a cylindrical portion fitting within a cylindrical portion of an impeller 14, wherein the motor yoke is fixedly attached by hooking members 38 integrally molded with the impeller of elastic resin.

Prior Art

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
